SPC & STATISTICAL TECHNIQUES

TRAINING

SPC (Statistical Process Control) and statistical techniques, emphasizing their role in data-driven decision-making and process improvement. Through lectures, interactive workshops, group discussions, case studies, and practical data analysis, participants will gain a comprehensive understanding of SPC principles and how to apply statistical methods effectively. participants will be well-equipped to use SPC tools and statistical techniques for quality control, process improvement, and informed decision-making in their organizations

TRAINING COURSE CONTENT

- Introduction to SPC and Statistical Techniques
- SPC Fundamentals
- Control Charts and Data Collection
- Statistical Techniques for Process Improvement
- Case Studies and Real-world Examples

TRAINING METHODOLOGY

- Lectures: Deliver foundational knowledge on SPC and statistical techniques.
- Interactive Workshops: Engage participants in hands-on exercises applying statistical methods.
- Group Discussions: Encourage knowledge sharing and problem-solving.
- Q&A Sessions: Address participant questions and concerns.
- Case Studies: Analyze real-world applications of SPC and statistical techniques.
- Practical Data Analysis: Apply statistical techniques to real data.

TRAINING DELIVERABLES

- Training materials, including presentation slides and reference documents.
- Hands-on experience in applying SPC and statistical techniques to real data.
- Insights from real-world case studies.
- Answers to participants' questions and concerns.
- Enhanced knowledge and skills in SPC and statistical methods.

OBJECTIVES

- Understand the principles and significance of Statistical Process Control (SPC) and statistical techniques in process improvement.
- Learn key statistical concepts and how to apply them.
- Acquire practical skills in using SPC tools and statistical methods for data analysis.
- Recognize the importance of data-driven decision-making and continuous improvement.
- Explore successful real-world applications of SPC and statistical techniques.

DURATION OF TRAINING ONE MAN DAYS
